HOW TO INSTALL BATTERIES
1. Open the battery door with a screwdriver. (A) If used batteries are present, remove these batteries from the unit by pulling up on one end of each battery. DO NOT remove or install batteries using sharp or metal tools.
2. Install new batteries as shown in the polarity diagram (+/-) inside the battery compartment.
3. Replace battery door securely. Check your local laws and regulations for correct recycling and/or battery disposal.

HOW TO CHARGE
1. Turn the vehicle off.
2. Remove the cover from the charging cable compartment.
3. Plug the charging cable into a computer or wall adapter. Only connect USB charging cable to a computer or other 5VDC rated power source.
4. Headlights indicate charging. Blinking for charging and ON when fully charged.

HOW TO DRIVE
1. Turn the vehicle and place on a flat surface.
2. Hold the controller near your truck, press the power button wait until power light stops flashing.
3. You are ready to drive.
4. Use the remote control to drive.

TROUBLESHOOTING
NOTE: If your truck does not connect to the controller the first time, turn the truck off, take the batteries out of the unit by pulling up on one end of each battery. DO NOT remove or install batteries using sharp or metal tools. If used batteries are present, remove these batteries from the unit by pulling up on one end of each battery. DO NOT remove or install batteries using sharp or metal tools.

NOTE: If normal function of the product is disturbed or interrupted, strong electromagnetic interference may be causing the issue. To read product, turn it completely off; then turn it back on. If normal operation does not resume, move the product to another location and try again. To ensure normal performance, charge the batteries, as the batteries may not show full function.

Safety Precautions: - Keep hands, hair and loose clothing away from the motor/ wheels when power switch is turned ON. - Remove battery if vehicle will not be used for a week or more. - Keep straight ahead when using remote control in order to maintain performance. - Never stab, cut, slice or puncture battery. - Never use acid, water, or other chemicals to clean the outside of the battery. - Never allow the battery to get wet. - Do not allow the battery to be charged with any battery charger. - Only use the batteries in the device specified by Spin Master™. - Carefully read the instruction guide and follow the instructions correctly. - In the unlikely event of leakage or explosion use sand or a chemical fire extinguisher for the battery. - Do not disassemble, modify, heat, or short-circuit the batteries. Do not place them in fires or leave them in hot places. - Do not disassemble or replace any battery unless you are sure that you can safely dispose of it. - Do not put batteries into garbage disposal bins. - Batteries must be recycled or disposed of properly.

PRODUCT BATTERY REMOVAL INSTRUCTIONS:

Internal battery is factory installed and non-replaceable. Product disassembly and battery removal must be performed by an adult. Do not attempt to remove battery. If battery compartment has been opened, use a screwdriver to remove screw. Lift end of battery compartment and slide out battery. Dispose of battery in accordance with your local battery recycling or disposal laws.

FOR MONSTER JAM RC VEHICLE:

Internal battery is factory installed and non-replaceable. Product disassembly and battery removal must be performed by an adult. Do not attempt to remove battery. If battery compartment has been opened, use a screwdriver to remove screw. Lift end of battery compartment and slide out battery. Dispose of battery in accordance with your local battery recycling or disposal laws.

NOTE: Opening of product will render product inoperative and voids manufacturer warranties. Dispose of remaining product components in accordance with local laws.
